

Dear Sirs and Madams

Please see the attached FONAR for the M/V Delphinus, IMO 9137844, which is expected to arrive in the United States ECA on/about 12/18/2013 @1100am. Although the vessel received fuel that was compliant for sulphur content(.96), the fuel can not be used by the vessel at this time due to COMBINED ALUMINIUM & SILICON CONTENT EXCEEDS SPECIFICATION (RESULT 85 mg/kg AGAINST 80 mg/kg LIMIT). Therefore the sample was retested and was within specifications. However, owners are taking additional fuel to insure the lower combined alumina and silica
